Construction Limited &  
Transportation Services

Avery Construction Ltd.  
940 Second Line West  
Sault Ste. Marie, ON P6C 2L3

## Transportation

We have extensive experience in all sorts of situations and are capable of hauling virtually anything ranging from materials like steel, wood, and paper to heavy machinery and aggregates. We can permit in all Provinces and Territories, as well as the United States.

Major customers include, Essar Steel and Algoma Tubes as well as many other local companies. Finished product from these mills is hauled throughout Ontario for the most part, with the occasional trips to Western Canada and the United States. Back hauls usually consist of flat bed loads, with several tractor units. Each one has a different capacity up to 80,000 lbs dedicated.

We also haul logs from the harvest areas to the mills and also have a unit dedicated to hauling trusses manufactured by Soo Mill throughout Ontario and Michigan.

## Harvesting

We have always worked closely with the logging industry building the haul roads and bridges, floating the equipment and hauling the logs. In the spring of 1999 we went one step further and successfully began a full scale harvesting operation. We have harvested for companies such as Sustainable Forest Technologies, Ontario Wagner Forest Management, and Domtar. In the winter of 2016, we began harvesting on the Carp Road for Prentiss & Carlisle and are presently harvesting up the Mile 38 Road. In addition, we have been contracted to provide winter maintenance on the Mile 38 Road from the highway to Batchawana Station.

## Material Handling

In the summer of 2000 a new opportunity arose for Avery Construction with the new owners of the Tubular Division located at Algoma Steel Inc. We negotiated a contract to handle tubular products being imported from overseas to their new facility. Our contract consists of trucking the tube rounds and finished pipe from the dock to their property. The tube rounds are delivered to the mill and the finished pipe is brought to the pipe yard where we sort according to destination. Our crew then loads the pipe on railway cars or highway tractors depending on its final destination. Although this was a big step for the company, we feel diversity is the key to success and survival in an ever changing marketplace.

## Construction

We possess a great deal of experience related to many aspects of the construction industry including:

- \* Forest Access Road Building
- \* Land Clearing and Grubbing
- \* Industrial Land Development
- \* Commercial Land Development
- \* Municipal Road Construction
- \* Demolition
- \* Earth Works and Pipe Works
